4th ANNUAL ESGID CONFERENCE

BARIATRIC NUTRITION

Course

- All about surgical aspects of different bariatric surgeries
- How to prepare the patient before surgery
- Assessment, investigations, nutrition, psychological well-being before bariatric surgery
- Post operative diet phases
- A special topic about mineral and vitamin supplementation and micronutrient deficiencies
- Medical and nutritional complications
- Psychological health
- Tips and tricks
- Physical activity
- Bariatric in special situations including adolescence, pregnancy, diabetes, cardiac and hepatic cases.
- Post operative GIT symptoms and SIBO, how to manage?
- Obesity medications and Bariatric

Not only that, but the course also includes practical clinical cases discussion (problem solving). As we are keen to ensure the quality of the course, there will be assessment quiz at the end.
