LOCATION

10th ANNUAL CONFERENCE 2025 GREEN ANESTHESIA AND INTENSIVE CARE

ANESTHESIA, INTENSIVE CARE AND PAIN MANAGEMENT DEPARTMENT,
AIN SHAMS UNIVERSITY

Dear Colleagues,

Welcome to the **10th Annual Ain Shams Anesthesia Conference**. This year's theme, the display of Anesthesia Intensive Care and Pain Management concepts into real life experiences, will bring together anesthesiologists, intensive care physicians and pain specialists to provide the framework to participate in thought-provoking discussions, plenary sessions, workshops, poster presentations with acclaimed experts from different countries. We are going to focus on green Anesthesia and green intensive care unit, Green Anesthesia refers to practices That Minimize The enviromental Impact of Anesthesia. These involve reducing or eliminating Inhaled anesthetics with high global Warming Potential using low-flow techniques, and exploring alternative methods like regional anesthesia or intravenous options.

This day The Anesthesia department, intensive care unit and pain management Faculty of Medicine Ain Shams University Will Celebrat **76 year** progress and Improvement.

This is an exclusive oppotunity for experts to share their latest findings, technical expertise and experiences in different fields of anesthesiology, intensive care and pain management. The scientific sessions will be arranged in an interdisciplinary manner to allow delegates to explore issues directly connected to their own areas of work. The conference will also provide an opportunity to engage with Eminent Delegates, Speakers, Exhibitors, Sponsors, Collaborators, Participants, etc of our conferences from a wide range of disciplines.

Featuring guest speakers, presentations, group discussions and hands-on workshops, this year's conference is intended to improve competence and performance by reviewing not only the basics of anesthesia, intensive care and pain practice but also updating the registrant to current, evolving and state-of-the art practice (i.e. knowledge). The hands-on workshops using mannequins will allow the learner to apply this competence to their everyday practice (i.e. performance) and prepare for the rare, unanticipated emergencies. Being prepared for emergencies as well as for the more common adverse events, the learner will be better equipped to improve patient outcomes. On behalf of the organizing and scientific committee, we are very pleased to offer you the opportunity to participate discussions and presentations and to share your expertise and knowledge.

We look forward to see you at this upcoming event.

Conference President

Prof. Dr. **Sherif Farouk**

Chairman of the department of Anesthesiology, Intensive Care and Pain Management,
Faculty of Medicine, Ain Shams University
